What Happens in Our Class?

Our class is made up of 8 students. We work hard on developing independency, life skills and communication. The students have decided that they will help each other and always try their best

The School Day

The students begin the day by completing personalised tasks and physio. They choose and prepare their own snacks and drinks where appropriate and then enjoy social time together. Throughout the rest of the day students take part in a range of activities including food preparation, work experience, ICT, life skills development, creative art, gardening, yoga, peer massage and swimming.
