

Create your own photo stories to read on an Ipad. They can even be printed out if you have a connection to a printer....

The 'Our story 2' app icon looks like this....it is free to download from the app store on your Ipad.

The first screen looks like this. If you click on to the 'get started' button it will give you a tutorial on how to use the app.

It seems to work best if you take the photos once the app is open and then add them to your stories, however taking the photographs with the Ipad is a fun thing that the student may like to do themselves or with you. It will make sure that the things in the story are meaningful to them.

You can save and re-watch the stories once they are made and students can swipe to read them as well as hear the words if you add recordings.
